

LinearX Engineering Software - Key Identification

LinearX engineering software programs require a hardware key or 'dongle' to function. There are four different models that have been utilized over time, the most current being the MMK (Multi Mode Key) recently designed by LinearX. The MMK is required if you want to use LinearX engineering software under Windows NT. Older versions of the software packages do not support the MMK. The following information will help you to determine what type of key you have and whether you need to upgrade to the MMK.

	1207	1405	1410	MMK
Windows 3.x	X	X	X	X
Windows 95	X	X	X	X
Windows NT				X
LEAP 4.58 (or lower)	X	X		
LEAP 4.60 (or higher)		X		X
FilterCAD 1.13 (or lower)			X	
FilterCAD 1.14 (or higher)			X	X
